PROFESSIONAL EXPERIENCE

HR Operations & Payroll | HR Program Manager

Nov 2024 – Present

TENB Fintech Pvt. Ltd. (AMBAK) — Gurugram, Haryana

- Grew with the company from 100 to 600+ employees, keeping HR operations and payroll steady the whole way through that fast growth.
- Run monthly payroll for 600+ employees together with our payroll vendor: checking and validating every input, sharing what they need, staying on top of the coordination, running the accuracy checks, and preparing the final bank file. The checks put in place stopped the errors that used to slip through, so people are paid correctly and on time.
- Look after the whole employee journey, from welcoming new joiners to handling exits and full-and-final (F&F) settlements, so people have a smooth experience from their first day to their last.
- The person employees come to with questions about their payroll, tax, investment declarations, FBP declarations, and leaves, sorting things out quickly so no one is left confused.
- Built the company's Performance Management System (PMS) from the ground up, giving everyone a clear and fair way to set goals and be reviewed.
- Set up automatic offer letters and an approval flow, so the team no longer drafts them by hand or chases approvals over email, and offers now go out much faster.
- Brought in an Applicant Tracking System (ATS) that made hiring smoother, shortened time-to-hire, and gave candidates a better experience.
- Set up an HRMS to keep all employee data in one place, take the manual work out of HR processes, and make everyday HR quicker for everyone.
- Got a Learning Management System (LMS) up and running so people can learn online and keep growing in their roles.
- Built reports and dashboards for headcount, payroll, training, and attrition that replaced manual spreadsheets and gave leaders a clear, live picture.
- Looked closely at attrition, comparing cost-per-hire against people leaving within 90 days, and turned what came out of it into practical hiring and retention suggestions.
- Negotiated better pricing with recruitment vendors to bring hiring costs down without lowering the bar on talent, and worked closely with leadership to keep HR technology in step with where the business is heading.

KEY PROJECTS & INITIATIVES

- **Offer Letter & Approval Automation** — Built a system that creates offer letters with the candidate's details already filled in and sends them through a proper approval chain. It replaced a manual, email-heavy process and keeps a clean, error-free record of every offer.
- **PMS Self-Appraisal Workflow** — Designed the whole appraisal flow: an employee fills in their self-appraisal, the manager automatically receives a copy with those answers already filled in, rates and comments on each KRA, and it then goes to the HOD to sign off. It made appraisals consistent across the company and took away all the manual chasing.
- **Attrition & Cost-Per-Hire Analytics** — Looked at attrition and cost-per-hire alongside 90-day exits to see where early leavers were costing the company, which helped sharpen how the team hires and holds on to people.
- **HR Systems Implementation (PMS, ATS, LMS, HRMS)** — Led the rollout of the core HR tools, from choosing vendors and setting up workflows to moving data over and getting everyone actually using them.

- **Aadhaar & PAN Parsing Automation (Python)** — Wrote a Python tool that reads Aadhaar and PAN cards and pulls the details out on its own, so the team stopped typing them in by hand during onboarding, made fewer mistakes, and got people set up faster.
- **Automated Attendance Summary Distribution** — Set up a system that emails each person their own attendance sheet before payroll, so everyone can see their own days clearly. It cut down the back-and-forth and confusion around payroll.
- **Training Data & Reporting Automation** — Automated the training records and the regular HR reports, so they are no longer kept up by hand and come out reliably every time.

EARLIER EXPERIENCE

Learning Operations & MIS Analyst

May 2023 – Nov 2024

Cars24 — Gurugram, Haryana

- Built and shared training dashboards, keeping an eye on how things were trending day to day and month to month.
- Kept KRA and KPI dashboards going for trainers to track and review how they were doing.
- Worked with HRBPs to make sure employees knew about new training sessions.
- Automated data and tracking work to cut down on manual reporting.

Data Analyst Intern

Nov 2022 – Apr 2023

GoMechanic — Gurugram, Haryana

- Cleaned and checked existing data so it was accurate and reliable to work with.
- Used statistical methods to handle large databases and make sense of data from partners and customers.
- Worked across teams, shadowing different departments to understand how the day-to-day actually runs.
- Found the root of problems through data and suggested ways to fix them.

EDUCATION

Bachelor of Computer Applications (BCA)

Aug 2022

Sherwood College of Professional Management, Lucknow, UP

Senior Secondary (Intermediate)

Mar 2018

St. Don Bosco College, Lakhimpur-Kheri, UP

High School

Mar 2016

St. Don Bosco College, Lakhimpur-Kheri, UP

TECHNICAL SKILLS

HR Systems: PMS, ATS, LMS, HRMS — implementation, configuration & administration
